

SIC - AnaSys Service Bureau

Swiss Franc payment system SIC and AnaSys Service Bureau

Swiss Interbank Clearing (SIC) ...

- is a Real-Time Gross Settlement System (RTGS) in Swiss Francs
- operated by SIX payment services and the Swiss National Bank (SNB)
- live since 25 years, long before Target2
- provides sending/receiving of payment messaging and also interactive liquidity enquiry messaging, highly efficient real-time clearing and low-cost transaction fees
- is part of the Swiss Value Chain providing direct settlement in CHF for SWX, SECOM and Eurex

AnaSys AG...

- is a Swiss company and experienced provider of SIC-interfaces and services since the early days of SIC
- is the supplier of the SIC-interfaces of some of the major SIC players, PostFinance and Eurex
- operates a Service Bureau (SB) giving their participants direct access to SIC via a secure internet connection, needing no leased-lines, no hardware boxes, no card-readers, no switching between different views for payments and liquidity checking.
- only a standard internet browser is needed.

How to connect to SIC via AnaSys SB...

- apply for SIC membership and open an account with SNB (AnaSys assists their customers in these steps)
- sign an agreement with AnaSys SB
- receive secrets and start working immediately when membership has been appointed

Benefits and Advantages

- » Connection to and Integration into any back office system
- » Browser based access and message creation without any desktop installation
- » Extensive search and report options
- » long time storage of all SIC transactions
- » Direct access to SNB account

Features

- » all available message types (sending and receiving) and interactive inquiries implemented
- » Ibasec/HSM security
- » MiniSIC on CD
- » automatic update of the SIC Clearing Number database
- » integrated SIC Handbook as help file
- » full support of communication protocol options for blocking and windowing, providing fast connection
